

Data and Performance Engineering

Motorsport Consulting is able to provide you as racing team or racing driver on-track data engineering and performance engineering services.

We will assist you and your (race) engineering team, with car-set up and car performance challenges.

The scope of data and performance engineering can involve the following:

- Race engineering team support
- Car set-up performance analysis
- Driver performance analysis
- Car health monitoring and analysis
- Data acquisition and management
- Data analysis environment and math.
- Race/test event preparation
- Procedures and processes enhancement
- Document development and enhancement
- Strategy solutions
- Test item planning and development
- Pre and post event reporting
- Precise administration
- Workshop preparation and attendance
- Driver simulation training
- Driver development programme design

With an MSC degree in Motorsport Engineering & Management, substantial additional years of practical experience in mostly single seaters, but also GT's and sportscars, with driver and team championships to our name, we can show our pedigree in these specific skill sets.

We are able to cover full seasons of race events with in-season testing as well as accompanying pre and post season testing.

Motorsport Consulting is able to provide a high quality of work at the highest possible level.

Please get in touch for further information.
