

Race Engineering

Motorsport Consulting is able to provide you as racing team or racing driver on-track race engineering services.

We will assist you with car-set up and car performance challenges as well as help your driver to be comfortable with the car and let him be the best he can be for the event. Our speciality of understanding driver performance requirements allows us to have the best combination to create a winning package.

The scope of race engineering can involve all aspects of the race team:

- Car set-up and car management
- Data and performance analysis
- Race/test event preparation
- Procedures and processes enhancement
- Strategy solutions
- Test item planning and development
- Pre and post event reporting and analysis
- Precise administration
- Workshop preparation and attendance
- Driver simulation training
- Driver development programme design

With an MSC degree in Motorsport Engineering & Management, substantial additional years of practical experience in mostly single seaters, but also GT's and sportscars, with driver and team championships to our name, we can show our pedigree in these specific skill sets.

We are able to cover full seasons of race events with in-season testing as well as accompanying pre and post season testing.

Motorsport Consulting is able to provide a high quality of work at the highest possible level.
