

Simulator development

Motorsport Consulting offers assistance in enhancing your simulator. Whether that is advising on hardware and software choices, or specific race platform vehicle enhancement. This for your racing team or in your home simulator rig.

Having spent years in a driver development centre and racing teams where simulators have intensively been used, no lack of sim-coaching and development skills that could help add to your simulator training experience.

Services include:

- Hardware advice
- Software advice and installation
- Providing car models
- Enhancing set-up on existing car models.
- Visual display options within simulation software
- Visual display options on steering wheel
- Consulting in track enhancement.
- Data analysis software, math channels and worksheets
- Providing live timing and telemetry solutions
- Optional additional documentation to get most the systems

We are able to cater training at your desired location across the globe.

With an MSC degree in Motorsport Engineering & Management, substantial additional years of practical experience in mostly single seaters, but also GT's and sportscars, with driver and team championships to our name, we can show our pedigree in these specific skill sets.

Motorsport Consulting is able to provide a high quality of work at the highest possible level.
